

# Cellar2Bottle — Make Post-production Easy

MANAGING YOUR BOTTLING PROJECTS BECOMES EVEN EASIER

Cellar2Bottle Simplifies post-production workflow with a seamless blend of hands-on procurement, logistics support and smart digital convenience. Our services are designed to efficiently transform your cellar reserves and barrels into shelf-ready wine bottles and cases. From bottle, cork, and capsule procurement, to label design management or artwork coordination, label approval, and final shipment management, we handle every step before bottling to keep your projects moving smoothly. This can drive your revenue closer and improve certainty in your business operations.

With Cellar2Bottle software application, wineries gain instant visibility and control, tracking progress, approving assets and receiving real-time updates right from your phone and/or email. We remove the complexity of final-stage production and help wineries to stay on schedule, avoid costly delays and allow them to focus on the art of winemaking rather than paperwork!

The Challenge	Our End-to-End Solution	The Cellar 2 Bottle Advantage
<b>Moving from Cellar to Revenue</b> Wineries face significant logistical hurdles in transforming ready-to-sell wine in barrels or tanks into a market-ready product. This process is time-consuming and often unpredictable.	<b>Logistics Management</b> We take control of the entire physical supply chain, ensuring seamless integration of all components: Sourcing of glass, corks, capsules, and labels (or label approvals).	<b>Accelerated Revenue Cycle</b> By streamlining post-production, we significantly reduce the time your product sits in the cellar and accelerate its path to the shelf.
<b>Complexity in Production Detail</b> Managing vendors for bottles, corks, and capsules, coordinating artwork deadlines, and scheduling bottling runs are complex, resource-intensive tasks that can lead to costly delays.	<b>Wide Vendor Network for Packaging Materials</b> We provide access to an extended list of trusted suppliers for glass, corks, closures, boxes, labels and other materials. Or seamlessly coordinate with your preferred suppliers. We manage the logistics process of getting your label and artwork approved, printed.	<b>Time, Cost and Efficiency Gains</b> Consolidating all post-production services with a single, reliable partner reduces administrative overhead and maximizes production efficiency.
<b>Shipment and Fulfillment Uncertainty</b> Shipping delays between storage and distributions can be a major challenge. These hurdles can impact key distribution timelines and compromise business certainty.	<b>Simplify Shipping</b> We provide monitoring shipments from the app with access to transit or delivery events, as well as quotes from trusted local and out of state carriers in one place to ensure your shelf-ready products arrive on time at the site.	<b>Business Certainty</b> We provide a streamline approach that keeps distribution predictable, reduces stress, and protects your revenue.
